

Himanshu Kumar Thakur

Java Full Stack Developer

hkumar54321s@gmail.com | +91 6201340937 | [LinkedIn](#) | [GitHub](#) | Dehradun, Uttarakhand

Professional Summary

Final-year B.Tech CSE student with experience building scalable web applications using Spring Boot, React.js, and REST APIs. Skilled in backend development, database design, and API integration, with strong foundations in Data Structures, OOP, and system design — and a collaborative, detail-oriented approach to problem-solving.

Education

Quantum University

B.Tech in Computer Science & Engineering

Roorkee, India

2022 - Expected 2026

DAV Public School Sec-4

Class XII (CBSE)

Bokaro Steel City, Jharkhand

2020 – 2021

Work Experience

Java Developer Intern | InternPe – Remote

July 2025 – Sep 2025

- **Implemented exception handling** and input validation, improving application reliability and reducing runtime errors.
- Utilized **Core Java**, **Object-Oriented Programming (OOP)**, and **data structures** to implement modular and maintainable application logic for real-world scenarios.
- Executed multiple **console-based applications** (Tic-Tac-Toe, Rock-Paper-Scissors, Hangman) applying **algorithms**, **control flow**, and **problem-solving techniques**.

Academics & Projects

SAHI RAASTA - AI-POWERED CAREER GUIDANCE PLATFORM | Java, Spring Boot, React.js, MySQL, REST APIs, LLM API

Mar 2026 - Current

- **Built a full-stack React and Java web app** to provide dynamic, step-by-step career guidance from 10th grade onwards.
- **Incorporated an LLM API** to analyze user data and automatically produce tailored career and college roadmaps.
- **Established** a robust backend to support safe authentication, and seamless retrieval of customized roadmaps.

MEMORY ALLOCATOR SIMULATOR | Java, React.js, Spring Boot, REST APIs

Oct 2025 – Dec 2025

- **Developed a full-stack** simulation application using Java to implement core Operating System memory allocation algorithms, including First Fit and Best Fit.
- **Engineered** a robust REST API to seamlessly bridge the backend Java logic with the frontend.
- **Integrated a dynamic React** user interface to provide real-time, interactive visualization of memory allocation processes.

FULL-STACK CALORIE TRACKER | React, Java (Spring Boot), REST APIs, MySQL

April 2025 – July 2025

- **Orchestrated** a full-stack web application to track daily nutritional intake, utilizing React and Tailwind CSS for a responsive frontend and a Spring Boot backend for robust REST API management.
- **Designed** a modular MVC architecture using standard Java OOP principles, implementing a Service Layer to dynamically calculate Basal Metabolic Rate (BMR) and daily caloric limits based on user metrics.
- **Engineered** a normalized relational database schema to efficiently manage user profiles, food item catalogs, and daily consumption logs, ensuring seamless data persistence and retrieval.

Technical Skills

- **Languages** - Java, Python, C Programming, JavaScript, HTML/CSS
- **Frameworks & Libraries** - Spring Boot, React.js, Microservices Architecture (Spring Boot), RESTful APIs, TailwindCSS
- **Databases & Clouds** - SQL, MySQL, AWS
- **Core Concepts & Architecture** - Operating System, Computer Networks(TCP/IP, HTTP/HTTPS), Object-Oriented Programming (OOP), SDLC(Software Development Life Cycle)
- **Tools & Environment** - Linux, Git, GitHub, IntelliJ Idea, VS Code, Maven

Achievements & Volunteering Experience

- **GATE CSE Qualified** twice - **2026**(Final year) & **2025**(3rd year)
- Volunteered in **PAHAL - ek nanha kadam** (Education for village kids)
