PROFESSIONAL SUMMARY

GATE CSE Qualified (2025 & 2026) Computer Science & Engineering graduate with hands-on experience building full-stack Java applications using Spring Boot, React.js, REST APIs, and MySQL, and AI-powered solutions using PyTorch and Streamlit. Strong foundation in Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), System Design, and Computer Networks. Seeking an entry-level Software Engineer / Java Developer role to design and build scalable, reliable software.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: Spring Boot, Hibernate/JPA, React.js, JUnit, Mockito, Microservices, RESTful APIs, TailwindCSS, PyTorch, TorchVision, Streamlit, Opacus

Databases & Cloud: MySQL, SQL, AWS, Streamlit Community Cloud

Core CS Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems, System Design, Computer Networks (TCP/IP, HTTP/HTTPS), DBMS, SDLC, Deep Learning, Computer Vision, CNN

Tools: Git, GitHub, Docker, GitHub Actions, Linux, Maven, IntelliJ IDEA, VS Code, Jupyter Notebook, Postman

Coding Profile: 100+ Data Structures & Algorithms problems solved on [LeetCode](#) & Geeks for Geeks(GFG).

WORK EXPERIENCE

Java Developer Intern | InternPe (Remote)

Jul 2025 – Sep 2025

- Applied Core Java, Object-Oriented Programming (OOP), and Data Structures to design modular, maintainable application logic for real-world console-based use cases.
- Implemented exception handling and input validation across modules, improving application reliability and reducing runtime errors.
- Built multiple console-based Java applications (Tic-Tac-Toe, Rock-Paper-Scissors, Hangman) using algorithmic logic, control flow, and problem-solving techniques.

ACADEMIC PROJECTS

Privacy-Aware Medical Image Analysis | [Link](#) | PyTorch, CNN, Streamlit, Opacus *May 2026 – Jul 2026*

- Built an AI-powered web application for automated pneumonia detection from chest X-ray images using PyTorch, DenseNet121/CNN, and Streamlit, enabling real-time medical image classification.
- Strengthened patient data privacy by integrating Differential Privacy (Opacus), calibrated confidence estimation, Grad-CAM visual explanations, and downloadable PDF diagnostic reports.
- Designed and deployed a responsive healthcare dashboard and user interface, hosted on Streamlit Community Cloud.

Memory Allocator Simulator | Java, React.js, Spring Boot, REST APIs

Oct 2025 – Dec 2025

- Developed a full-stack simulation application in Java implementing core Operating System memory allocation algorithms, including First Fit and Best Fit.
- Engineered a REST API to connect backend Java logic with the frontend, enabling seamless data exchange.

Full-Stack Calorie Tracker | React, Java (Spring Boot), REST APIs, MySQL

Apr 2025 – Jul 2025

- Built a full-stack web application to track daily nutritional intake using React and Tailwind CSS for the frontend.
- Designed a modular MVC architecture following Java OOP principles, with a Service Layer to dynamically calculate Basal Metabolic Rate (BMR) and daily caloric limits based on user metrics.

EDUCATION

B.Tech in Computer Science & Engineering | Quantum University, Roorkee, India *Aug 2022 – Jul 2026*

Class XII (CBSE) | DAV Public School, Sec-4 Bokaro Steel City, Jharkhand

2020 – 2021

ACHIEVEMENTS & VOLUNTEERING

- GATE CSE Qualified twice — 2026 (Final Year) and 2025 (3rd Year) among more than 150k+ students.
- Co-member of a codex coding club in college co-hosted multiple coding events.
- Volunteered with PAHAL – Ek Nanha Kadam, an initiative providing education support to village children.
